

## ICEMELT

ICEMELT IS A HIGH PERFORMANCE MULTI-COMPONENT DEICER SPECIFICALLY FORMULATED FOR USE IN HIGHWAY, COMMERCIAL, RESIDENTIAL AND INDUSTRIAL APPLICATIONS. A COMPACTED BLEND OF HIGH PURITY CALCIUM AND SODIUM CHLORIDES, ICEMELT WILL CUT THROUGH COMPACTED ICE AND SNOW TO MELT AND PREVENT ICE FORMATION AT TEMPERATURES DOWN TO -20°C

- ✓ Economic in use – efficiency of icemelting means typically up to 75% less is required in comparison with de-icing salt.
- ✓ Rapid icemelting capability due to heat generation (exothermic reaction with moisture).
- ✓ Long lasting effect due to synergistic combination of calcium and sodium chlorides.
- ✓ Effective over a wider range of temperatures than sodium chloride alone.
- ✓ Clean de-icing product with no grit or impurities.

- Icemelt's Calcium Chloride component conforms to ASTM D98 and AASHTO M144
- Contains corrosion inhibitor to protect infrastructure
- Lower environmental impact than sodium chloride when correctly applied
- Suitable for use on highways and motorways, pavements, driveways, car parks, ramps, steps and walkways.
